

Canon imagePASS-S2

Server & Controller powered with the:

imageRUNNER 7105/7095/7086/5075/5065/5055/5050

Uniting all network users with a powerful, fully integrated document printing workflow that delivers productivity, flexibility and security.

For outstanding performance and seamless network integration in a variety of print environments, count on the imagePASS-S2 embedded controller. From corporate workgroups and small-medium businesses to print-for-pay and mid-production environments the imagePASS-S2 controller is an intuitive and productive document workflow and printing solution.

With exceptional usability, simplified workflow, the imagePASS-S2 controller is complete with powerful utilities that are all provided as standard features, making it a potent solution for any printing task.

Optional applications like EFI Hot Folders and Virtual printers take automated printing to the next level. Users can “drag & drop” files into hot folders that are pre-configured to print the job with job specific settings for guaranteed results, or to virtual printers that appear as network printers to users, performing specific tasks that have been pre-configured by the system administrator. Other options includes EFI Impose™ Fiery Edition, which provides advanced booklet and imposition capabilities, adding flexibility and functionality to the imagePASS-S2 controller and making it an excellent solution for all productive office, and print-for-pay environments.

Productivity

With System 8e, the imagePASS-S2 is a robust utilization of Fiery smart RIP technology, productivity tools and logical workflows that drive increased performance for all users. The SmartRIP 2 tool dramatically speeds printing of Microsoft Office and Adobe applications by providing an intelligent path through the image and graphic rich files that typically slow non-Fiery devices. And the RIP-and-Print utility drives up to 30% more pages (per time period) through printers in demanding environments.

Flexibility

Standard on the imagePASS-S2, NetWise™, features an innovative design that virtually guarantees easy connectivity and ensures seamless integration in any network environment including “peer-to-peer” (SNB) support for Windows® workstation printing. And, with intuitive WebTools™ and network visibility through WebJet Admin, network administrators, lead operators and casual users all have access to easy job and device management

tools. ImagePASS-S2 provides a flexible solution for all corporate intranets, WAN's and workgroups.

Security

The ImagePASS-S2 controller incorporates strong security utilities ranging from limiting who has access to the controller to securing the data itself. Administrators have the ability to set general authentications, disable network ports and services, set IP filtering and implement supporting anti-virus software. With features like Secure Erase, administrators and users are able to enhance security by erasing data stored on the controller's hard drive, employing an overwriting protection scheme to erase all traces of deleted information for optimal security in any setting.

Canon imagePASS-S2

Server & Controller powered with the

imageRUNNER 7105/7095/7086/5075/5065/5055/5050

Specifications

Hardware

- Intel Celeron Processor
 - 2.8 GHz
 - 256+MB DDR SDRAM
 - 80GB Hard Drive
 - Fiery SmartRIP® 2
 - CD-ROM

Fiery System 8e Utilities

- EFI Driver
- Command WorkStation
 - Windows Edition
 - Macintosh Edition
- Fiery WebTools™

EFI Video Interface Card

- Fiery RIPChips™
- ECT Compression for flexible compression ratios and visually lossless image quality

Operating System

- Linux

Fiery System 8e Options

- EFI Hot Folders/Virtual Printers
- EFI Impose™ Fiery Edition

Networking/Connectivity

- Simultaneous Autoswitching Protocols
- EtherTalk II
- TCP/IP
- Novell IPX

Autosensing Ports

- RJ45 for on-board 10/100/1000 Base-T and 10/100 Base-T
- Automatic IP configuration

SNMP Printing Support

- AppleTalk
- Pserver
- SMB (peer-to-peer)
- LPD

Safety

- CE Mark
- CSA
- TUV/GS
- UL
- CB Scheme
- RoHS

EMC

- EN55022 Part B (CE marked)
- FCC Class B
- VCCI II

Power Supply and Consumption

- Auto Switching 90-135/180-265VAc, 47-63Hz
- 6A @ 115Vac; 3A @ 230Vac

Dimensions

- 393.7mm (H) x 190.5mm (W) x 406.4mm (D)
